General Pipe Cleaner Mini-Rooter

2008-10-29 00:00:00 by DARSCO

Gives you light weight with a long reach

With 75 feet of 3/8" cable and a 1/3 hp. motor, the inexpensive Mini-Rooter clears lines from roof top to basement. You can do heavier work in 4" lines when the machine is equipped with 1/2" cable. You can remove the drum in seconds for more portability or to switch to a different diameter cable, with no mess and no lost time. A distributor tube inside the drum allows you to feed cable in and out without chucking and releasing the cable every few feet... so you finish quicker. For small drain work, you can order a special "J-Drum" for handling 1/4" or 5/16" x 50 foot cables. Drum is equipped with a collet chuck.
